the Willow Tree centre

Risk Assessment
Pioneering

Hazard	Who could be harmed/ risk level	Control Measures	Further Action
Slips, trips and falls	Participants Likelihood- 2 Consequence – 2/3	Participants instructed not to run and to be careful moving around the equipment	Leaders to brief participants before session
Equipment failure	Participants Likelihood- 2 Consequence – 2/3	Leaders to check equipment before and during use	Equipment checked at conclusion of session
Rope burns	Participants Likelihood- 2 Consequence – 2/3	Leaders to encourage care when using rope.	Leaders brief participants before use
Manual handling	Participants Likelihood- 2 Consequence – 2/3	Participants to be instructed in safe lifting and carrying as required	Leaders brief participants before use
Hit by object being moved	Participants Likelihood- 2 Consequence – 2/3	Participants to be aware of who is around them when carrying or moving equipment	Leaders brief participants before use
Fall from height	Participants Likelihood- 1 Consequence – 2/3	Risks of falls to be discussed before exercise starts. Final height to be calculated at start and limited if necessary	Leaders brief participants before use and supervise any activity at height

Likelihood- 1- unlikely 2- possible 3 quite possible 4- likely 5- very likely
Consequence 1- no injury 2 – slight injury 3- injury over 3 days 4 – death 5- multiple death

Current control measures - adult supervision, clear instructions, check equipment before and during exercise
Are these adequate? Yes **What other measures are necessary?** None **Monitoring -**accident book, equipment checked and logged
